

UBB TechTransfer

Internship

4th edition

● Technology Transfer

● Entrepreneurship

● Innovation

July 8th - August 2nd, 2024

<https://ttc.centre.ubbcluj.ro/>

Welcome **explorer!**

Why is it worth participating in the internship organized by UBB Tech Transfer?

1 Practical experience

You'll get a chance to see how technology and cognitive transfer work in a real working environment! You will learn how ideas can become reality and how new technologies are adapted and implemented in practice.

2 Exploring your own entrepreneurial potential

You will be able to assess your entrepreneurial potential, develop your entrepreneurial skills and even test your business ideas in an innovation-oriented environment.

3 Networking opportunities

You'll have the chance to interact with entrepreneurs, investors and industry professionals (along with other passionate peers), which can "open up" future collaborations or career opportunities.

4 Recognised traineeship

Since the internship involves 120 hours, you will be able to recognise it as a traineeship.

5 Improving personal and professional development

You'll be able to develop both personally and professionally by working in an interdisciplinary team, solving concrete problems and (we guarantee) getting out of your comfort zone. :)

Growing together!

What qualities do you need to apply for the programme?

- openness to innovation
- think outside the box
- communication skills both in social engineering and in interdisciplinary cross-cutting scientific areas
- initiative, proactive attitude

Let's see what we have in store for you this year!

- a training in technology and knowledge transfer
- actual scouting activities, innovation workshops, brainstorming sessions, team and individual activities.
- activities in future - oriented fields such as:
 - Cybersecurity;
 - Sustainability & Circular Economy Models;
 - AI & Health.

The internship activities organized by UBB TechTransfer, we will focus on identifying the potential for technological and cognitive transfer of the UBB structures. After completing the internship, students have the opportunity to continue their collaboration with UBB TechTransfer by signing a volunteer contract.

Entrepreneurship

2. Motivation letter (max 200 characters)
3. CV

The evaluation of the applications will be carried out by a selection committee, according to the selection criteria and within the period set for evaluation.

Some photos from last year ...

what did last year's students say?

„I learned a lot more than I expected. I learned about entrepreneurship, what is a start-up, how to present your idea to the investors, how to formulate a presentation. It was a useful experience that I would recommend to others who are interested in innovation.“

Marcel, Faculty of Chemistry and Chemical Engineering

„I learned very valuable things and somehow I think I got more than I bargained for. There were things I didn't expect to learn on a simple internship. I didn't expect to interact with research teams; I had the opportunity to do it, and I found it was very interesting, I didn't think I would ever have such an opportunity.“

Iasmina., Faculty of Mathematics and Computer Science

„I loved the fact that there were innovative ideas for example, the monitoring bracelets for children with ADHD; I liked how the technology combined with Psychology and the study of children's behavior. Here at AVALON I tried for the first time a VR set in my life.“

Estera., Faculty of Geography

„I personally don't plan to become an entrepreneur soon, but working in the field of IT, I consider that the internship has been a case study. I learned here that any entrepreneurship needs: a visionary, a specialist and an IT-ist. That means someone like me...“.

Denis, Faculty of Mathematics and Computer Science
